GLAZE MIXER

The Shimpo Glaze Mixer is ideal for mixing small batches of glaze for testing! Potters, schools and glaze manufacturers would greatly benefit from this product. Consistent mixing at speeds of 7 RPM for the mortar & 115 RPM for the Pestle offer controlled formulation and results.

The Glaze Mixer is an essential piece of equipment for anyone who wants to test new glazes. This machine can mix the glaze and sufficiently break down the glaze material to ensure accurate testing results. You can test many new glazes while using small amounts of material.

Please contact Shimpo Ceramics for more information.

Capacity: Min. 0.5 oz / Max. 9 oz

Dimensions: 8.5" x 13.75" x 24.5"

Power Source: AC 110V 60Hz
