BANDING WHEELS

NIDEC-SHIMPO's **BANDING WHEELS** are used for decorating, sculpting, carving and hand building. The ***DOUBLE BEARING*** design is like no other banding wheel; designed to provide reliably smooth and even rotation for the most delicate applications. It's no wonder they are the banding wheel of choice for studio artists, production potters and classrooms alike. We offer a selection of five different models with various wheel-head diameters and heights.
